Dear Parent/Carers

Re: Omegle website

We have been contacted by Humberside Police regarding a website called 'omegle.com'. Humberside Police have asked all local schools to alert parents due to the website causing concern and children being able to access it quite easily.

Omegle is a chat room website where users are connected to random webcams where no user registration is required. On the opening page of the website, there is a link called 'talk to strangers' where users are linked with other unknown users. The website works with just text or videos and is anonymous; no profiles are required in order to use the site. There have been local incidents reported to the Humberside Police where children have accessed the website and have been enticed to talk to unknown adults, and view/send indecent images.

If you would like help or support or if you have any questions about this website, please contact the Academy and we will do everything we can to support you as parents. We will continue to liaise with Humberside Police and update you with anything further.

Yours faithfully

Mr A J Clark
Principal
